

# CELFP 4-0-9

Nutrient help for all crops.

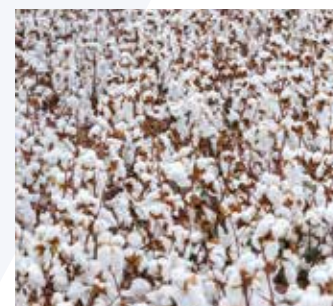

POWERED BY  CROP EXCELLENCE

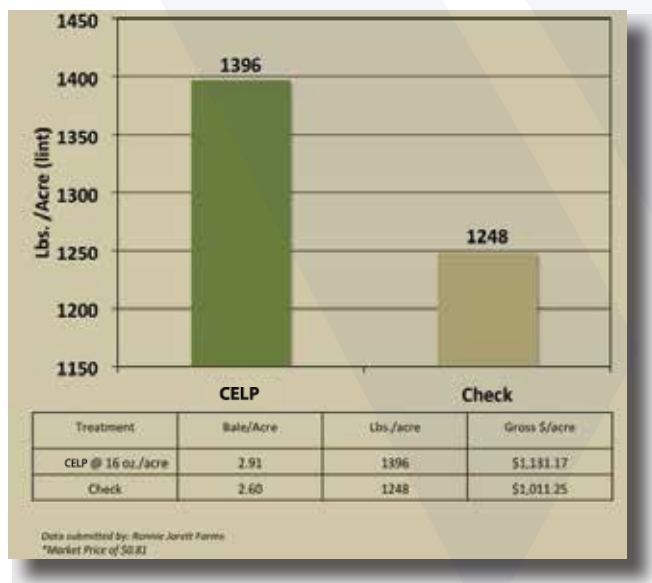

CELFP is a 4-0-9 foliar fertilizer that aids plants in producing higher yields, particularly in crops like tomatoes, melons, cotton, soybeans and other crops where fruit set is important. CELFP should be used during the peak fruiting stage of the crop and should be used in conjunction with normal fertilizer programs.

## CELFP Advantages :

- Increases yield
- Improves crop quality
- Increases plant mass
- Promotes healthier soil
- Enhances nutrient availability
- Reduces flash
- Increases flowering
- Reduces nematode stress

## Proven Foliar Treatment

### DIRECTIONS FOR USE

Apply 8-16 oz of CELFP 4-0-9 per acre foliar at peak productive stage.
