## NITROGEN STABILIZER

Because reduced yield and crop quality are not an option...

There's no shortage in crop production challenges these days; whether economic, environmental or social—obstacles to success add up. Crop Excellence is committed to helping growers meet those challenges by providing quality products at economical prices.

A common challenge is building an effective nutrient program. Pincer allows you meet that challenge without subtracting from the bottom line.

Up to 40% of unincorporated Urea can be lost due to volatilization and never reach your crop. Formulated as a Nitrogen stabilizer, Pincer protects your nutrient investment from volatilization. Pincer slows the conversion of Urea to a crop available form of Nitrogen, ensuring the opportunity to increase efficacy and better your return on investment.

### Benefits:

- Reduce volatilization of Urea and UAN applications
- Increase efficiency of Nitrogen application
- May increase crop yield and quality
- Protects fertilizer investment

### Available in:

- 2 x 2.5 Gallon Cases
- 275 Gallon Totes
- Bulk
