

# MixMaster™

## COMPATIBILITY AGENT

### Principal Functioning Agents:

Alcohol ethoxylate phosphate ester .....	55%
Constituents Ineffective as a Spray Adjuvant .....	45%
Total .....	100%

**MixMaster** is a 55% active alcohol ethoxylate phosphate ester, designed for use as an anionic compatibility agent that aids in the mixing of liquid fertilizers with pesticide tank solutions. When used as a compatibility agent in liquid fertilizer-pesticide spray mixtures, **MixMaster** improves the dispersion and uniformity of tank mix ingredients. **MixMaster** may be used with pesticides registered for use on all agricultural, forestry, industrial, non-cropland, rights-of-way, turf and municipal, and other uses.

It is recommended to add **MixMaster** to the fertilizer with the agitation on before adding the pesticide. Use 1 to 2 pints of **MixMaster** per 100 gallons of liquid nitrogen/pesticide tank mixture. Apply immediately after mixing. If allowed to stand for extended period of time, ensure that tank mix is agitated again before using.

**MixMaster** may be tested before use with liquid fertilizer and/or pesticide tank mixes.

### TYPICAL PROPERTIES

Appearance	Clear, amber liquid
Specific gravity (25°C)	1.02 – 1.12
pH (1% aq.)	2.5 - 3.5
Boiling Point	> 200°F
Flash point	> 200°F
Water solubility	Soluble
