BLACK POND DYE

Use Rates: 1 Gallon per 1 Surface Acre of H₂O up to 4 feet deep

Black Pond Dye is a water impoundment colorant. It is safe to use in all water impoundments. It will not harm fish or wildlife associated with water impoundments, safe to use treated water as irrigation source for all purposes. It should not be used in running or moving bodies of water due to dilution from standard use rates will significantly reduce efficacy of the product. Black Pond Dye reduces sunlight penetration into bodies of water and reduces and prevents weed and algae formulation in shallow bodies of water. It dyes the water a dark black color.

Black Pond Dye application rates will vary depending on water impoundment, depth and surface area. Optimal application rate is 1 gallon of Black Pond Dye per 4 acre feet of water impoundment. Treatment color will generally last 3 to 4 months depending upon rate used, intensity of sunlight, depth of impoundment and water movement. **SHAKE WELL BEFORE USING.**

SUGGESTED USE RATES: Calculate the surface area of water impoundment to be treated and average depth and use 1 gallon per 4 acre foot of depth. Best results will be observed if impoundment to be treated is applied from several locations. If unable to treat from several locations, treat from location where wind actively moves surface water.

PRECAUTIONARY STATEMENTS: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling.

STORAGE: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. **DISPOSAL:** Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best method of disposing containers if allowed by law. The Agriculture Recycling Container Counsel (ACRC) operates the national recycling center program. Contact your state and local ACRC through the ACRC website at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT: Seller represents and warrants that its products are manufactured in accordance with the products specification and that its products at the time of delivery to the purchaser shall be free from all material defects. Seller makes no warranty of any kind, expressed or implied, concerning the product, including but not limited to the implied warranties, merchantability, and fitness for a particular purpose are disclaimed. Further it is understood and agreed that liability will not exceed that of the return amount of the purchase price paid by the purchaser. And under no circumstances shall Seller be liable for special or indirect, incidental, circumstantial or punitive damages. Any use not in accordance with the product directions and precautionary statements, or modifications or additives, adulterations, dilutions or alterations by the purchaser shall void this warranty.
