

# UNDERTOW®

## 0-0-3 FIELD READY

### UNDERTOW® 0-0-3 CAN HELP IMPROVE PHOSPHATE FERTILIZER PERFORMANCE

**UNDERTOW® 0-0-3** is a nutritional additive for phosphate fertilizers, designed to enhance phosphorous availability, efficiency, and plant uptake. **UNDERTOW® 0-0-3** can be applied to dry and liquid phosphate fertilizer blends, unlocking the nutrient potential for maximum soil fertility and plant growth.

**UNDERTOW® 0-0-3** works to increase phosphate solubilization. This process begins with the active ingredients of **UNDERTOW® 0-0-3**, including certain organic acids that effectively lower the pH of the surrounding soil, creating an acidic environment that promotes the dissolution of insoluble phosphorus compounds. As a result, phosphate becomes much more soluble and accessible to the plant roots.

- ❖ Increased Nutrient Availability
- ❖ Improved Root Development
- ❖ Promotes Nutrient Absorption
- ❖ Enhanced Crop Yield
- ❖ Easy To Apply (Use rate of 1 quart per ton)
- ❖ Solvent-based for improved performance, easier, faster mixing, and better coverage of the fertilizer granule
