## **UNDERTOW® WINTER WHEAT TOP-DRESS TRIAL DATA Findlay Farm - Whitewater, WI**

- In April, we received 2.10" of rain, and temperatures were cool so the ground stayed cold and wet. There were only a few good dry days for fieldwork.
- In May, we received 1.35" of rain and temperatures warmed up greatly. Most days were sunny and windy, drying topsoil thoroughly. Conditions became increasingly droughty.
- In June, we received only 1.4" of rain and temperatures were much warmer than normal, wheat growth was strong.
- In July, we received 5.25" of rain, and temperatures were still warm, but rainfall helped greatly. Excellent to finish the wheat crop.
- 3.25" of total rainfall fell in the last four days of July.
- Plant density stands were excellent, no visible issues due to winterkill or from spring ponding or icing.
- Grain and straw were excellent.
- There was no disease in any of the wheat this year, head scab was not an issue, nor any other diseases. Overall grain quality was very good.

WINTER WHEAT  
TOP-DRESS TRIAL DATA  
Findlay Farm - Whitewater, WI**

**TagAlong® WINTER WHEAT TOP-DRESS TREATMENTS**

- 1. UAN 28% at 20 gal/acre (CHECK)**
- 2. UAN 28% at 19 gal/acre with TagAlong® at 1 qt/acre**
- 3. UAN 28% at 19 gal/acre with TagAlong® at 2 qt/acre**
- 4. UAN 28% at 19 gal/ac with TagAlong® at 1 qt/ac + CELP™ 4-0-9 @ 1 qt/ac**

**TREATMENT NOTES**

- Water spray volume: 15 gal/acre
- Seed treatment: October 7, 2022
- Emergence date: October 21, 2022
- Top-dress fertilizer: April 20, 2023
- Feekes 3.0/Foliar application: April 20, 2023
- Feekes 8.0: May 16, 2023
- Fungicide/Feekes 10.1: June 03, 2023
- Feekes10.5: June 07, 2023
- Harvest: Aug 23, 2023

## WHEAT YIELD RESULTS

# WHEAT YIELD DIFFERENCE

## WHEAT INCOME (GRAIN @ \$7.25/Bu)

**tagalong**  
natural soluble carbon

## TagAlong® WINTER WHEAT TOP-DRESS FIELD TRIAL CONCLUSIONS

- ✔ **TagAlong®** top-dress treatments increased yield and ROI.
- ✔ The combination treatment of **TagAlong® @ 1qt/acre + CELP™ 4-0-9 @ 1 qt/ac** is better than any other treatment (besides **TagAlong® @ 2 qt/acre** where they performed similarly) with 97% confidence. This treatment is significantly better than the standard check and commercial check with 99% confidence.
- ✔ **TagAlong® @ 2 qt/acre** increases yield and ROI.
